

POSITION OPENING WITH MASUEN CONSULTING, LLC

Water Management Technical Consultant

Masuen Consulting is seeking a team member who wants the opportunity to grow professionally, to be all they are capable of being, wants responsibility, likes being challenged, and has a sense of urgency about them. The successful applicant needs to reside on the east coast of Florida from Port St. Lucie to West Palm Beach for this telecommuting position. This is a great opportunity to join a well-established company of water management consultants and designers working with developers, contractors, governmental agencies, HOAs, farmers, and other 'green industry' professionals.

A company vehicle is provided along with a laptop and cell phone. We offer a competitive salary and benefits package.

DUTIES

- Consult and conduct evaluations and analyses on water management practices for urban, golf and agricultural projects
- Consult on, and conduct pumping plant, filtration, and control system analyses
- Utilize sophisticated analytical equipment for manual and automated site data collection
- Deliver professional presentations
- Write professional reports
- Be a great team player dedicated to meeting deadlines, detailed, and results oriented

EDUCATION

- High School diploma is minimum
- Four year college degree in agronomy, horticulture, agriculture, engineering or other related fields preferred
- Bilingual a plus (English/Spanish)

OTHER REQUIREMENTS

- Florida Driver's License in good standing
- Ability to pass a complete background check and drug screening process
- Willingness to take a personality profile analysis

BENEFITS

- Flexible work schedule
- Company vehicle and equipment
- Company cell phone
- Company laptop

- Retirement plan with 3% matching contributions
- Medical to include health, dental, vision, and life insurance
- Paid vacation
- Paid sick leave
- Educational incentives
